

1) Goals

Signup and login interface when the app is opened.

Intuitive home screen to help user navigate more effectively and cut down on confusion

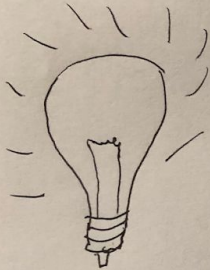

- a) Minimalistic one page design
 - b) Large, clear icons
 - c) Chores that need to be accomplished that day
- Calendar system to assist with task completion
 - Second icon on home page so that it will be easy to find
 - All future and completed tasks will be accessible to show who completed what
 - Household breakdown
 - Shows who has done what over the week/month and quantifies it (ex: Steve has done 5 things this week while Ed has only done 2)

2) Features

- Overview
- Calendar
- To do list
- Chores
- User journal
- Settings
- Easy to navigate
- Simple clean design
- Log in/Sign up
- How many chores a person has completed
- Give notification when the chore is due and when it's done.

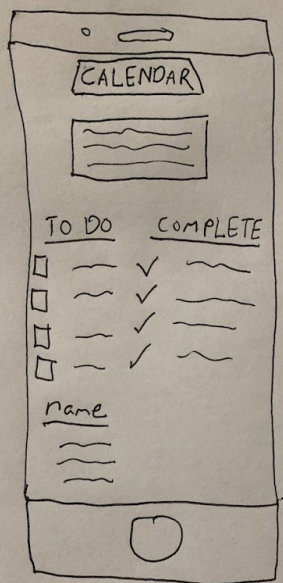

3) Solution Sketch

idea

Create a
Calendar that
is easy to use,
has notifications,
and checked off
items.

John Iannaccone

At the top you
can see the
calendar banner.
Below this is an
actual calendar
you can open to
see tasks or
add tasks. Below
that are to do
items. When they
are completed they
will move over to
complete. Below
that is an
area where a
name can be
added for a
given task.
